-----------------------------------------	-----------------------------------

Disclaimer; Grooming subject to change with unknown logging operations in the area. We also may have to schedule another groomer after heavy use and/or to coordinate with logging operations. We will schedule in the long bead lake loop as it becomes available as its lower elevation, and budget allows. Pau-Pac will be groomed when snow is available, if there is no logging operations on the route, and it will be done on an as needed basis this season.
