

# Laughing Jacobs Creek Channel Restoration

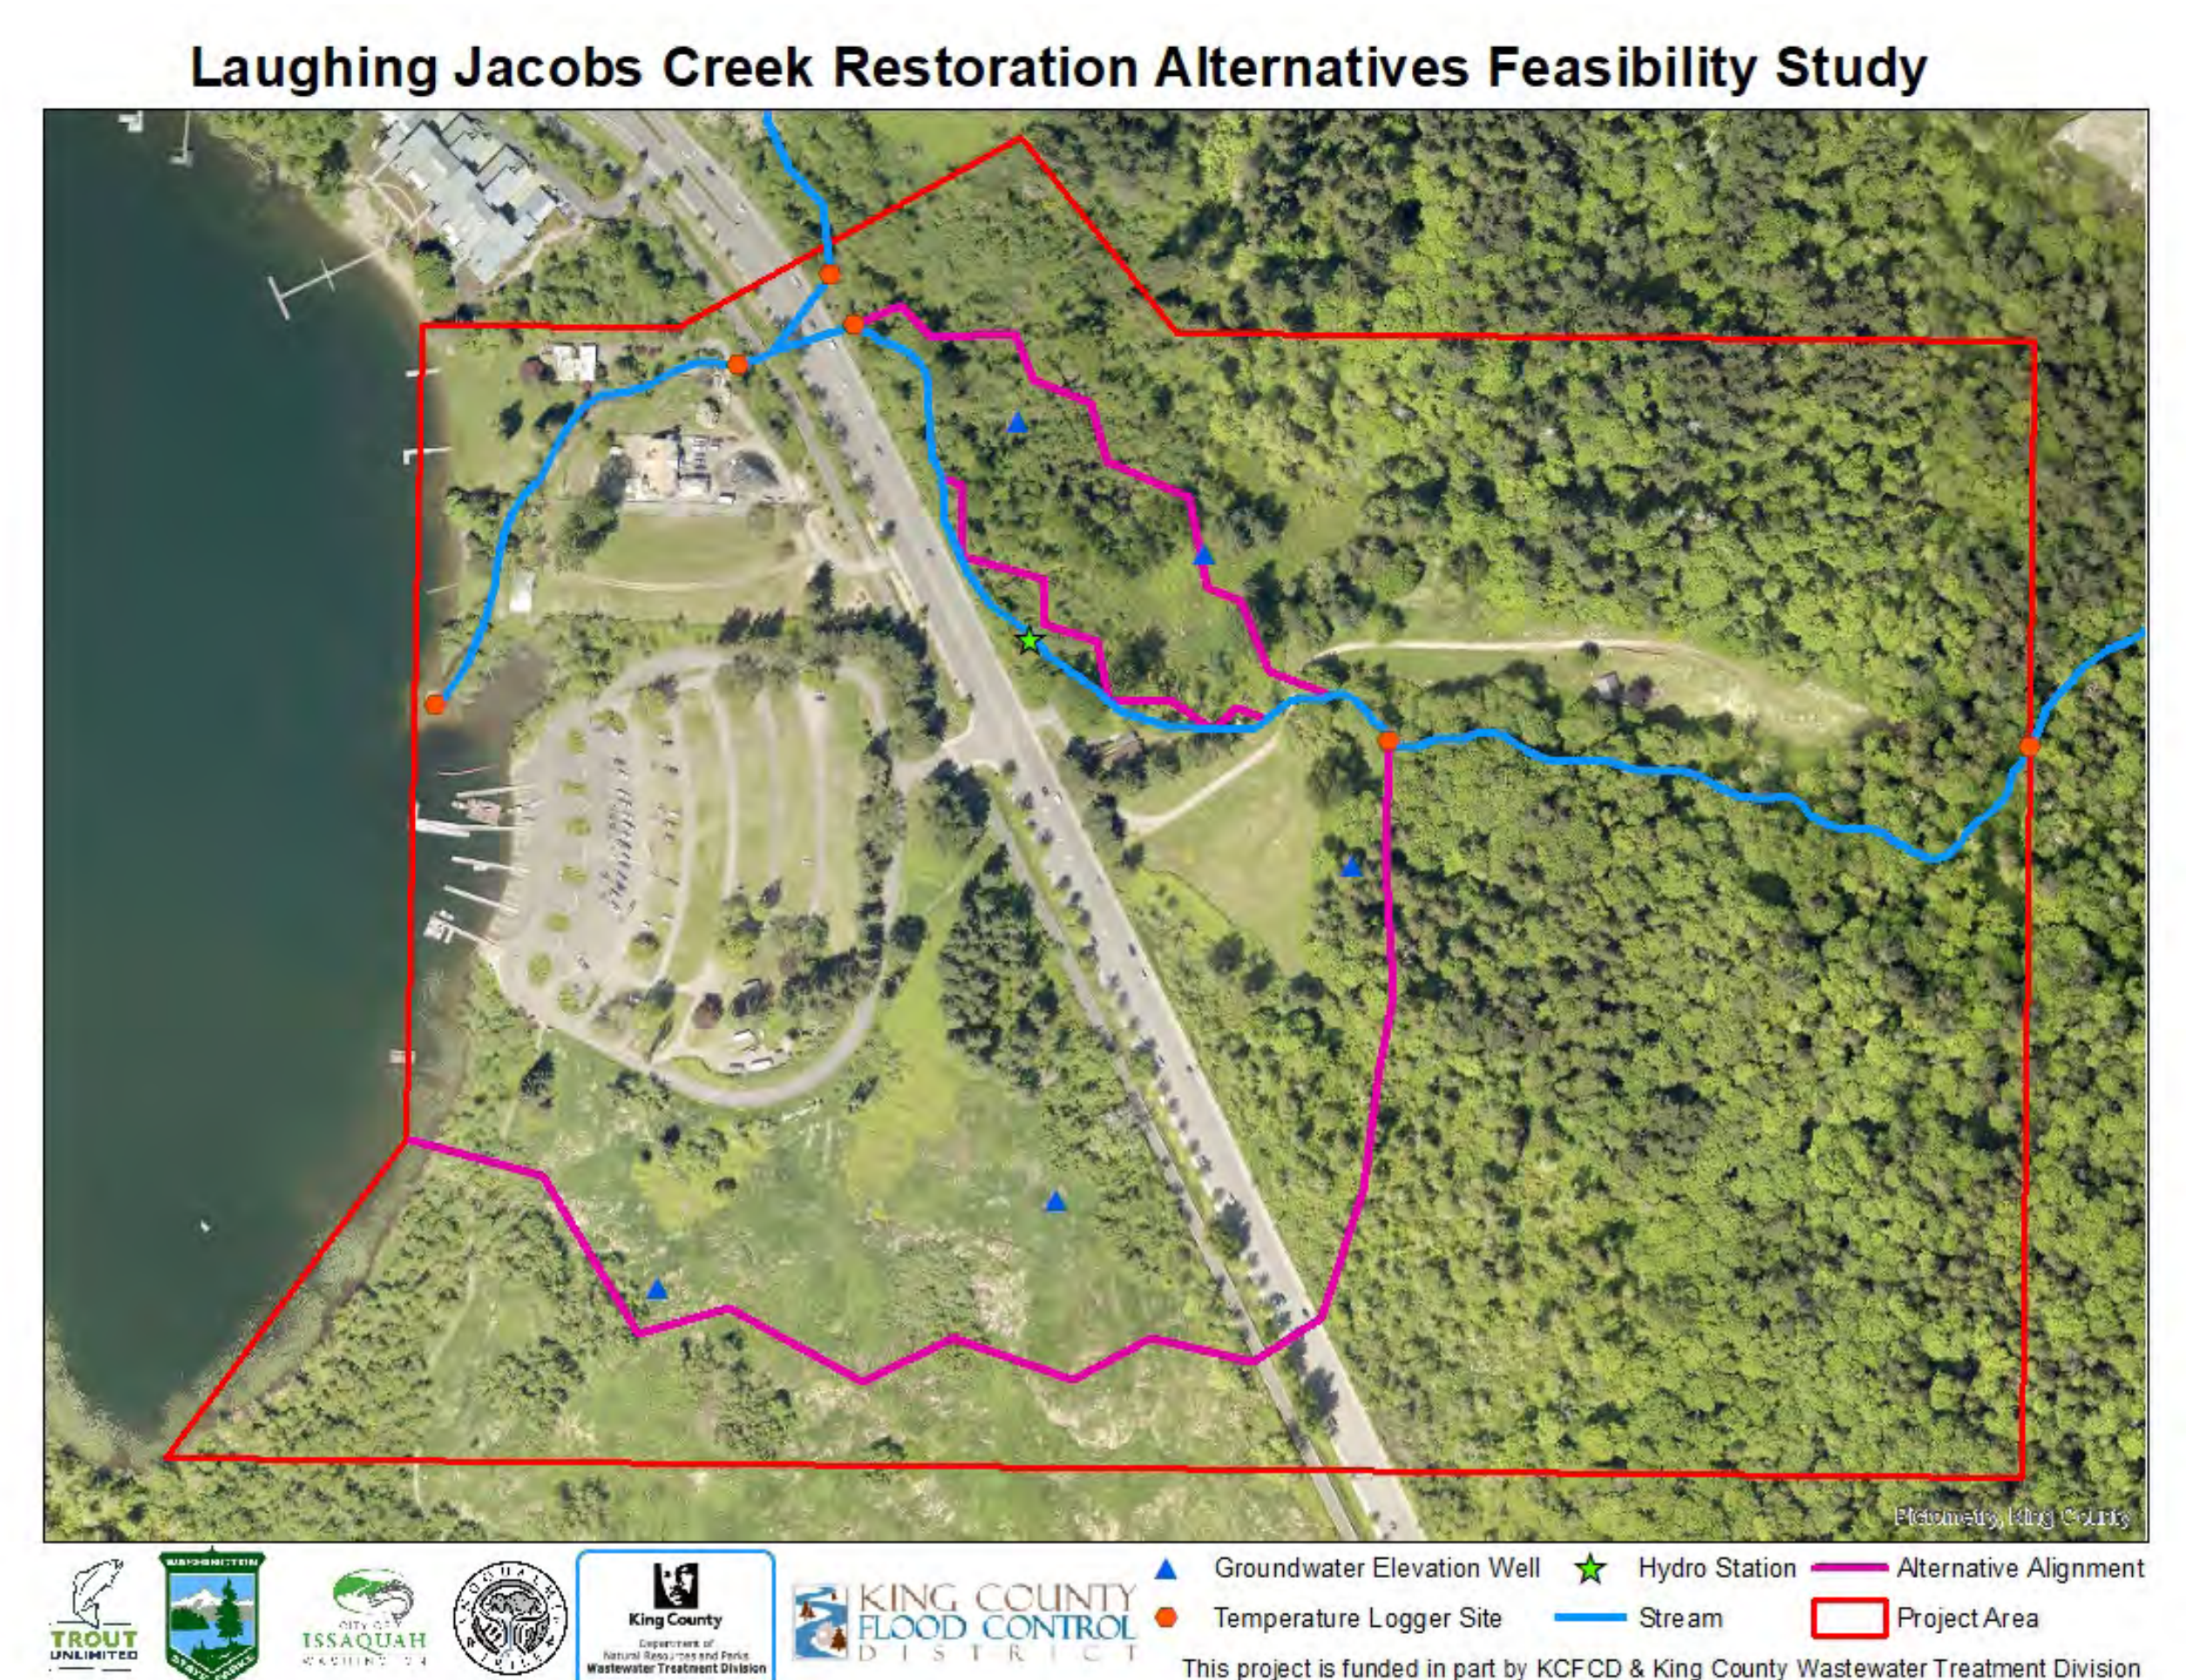

Provide Vital Chinook Rearing Habitat

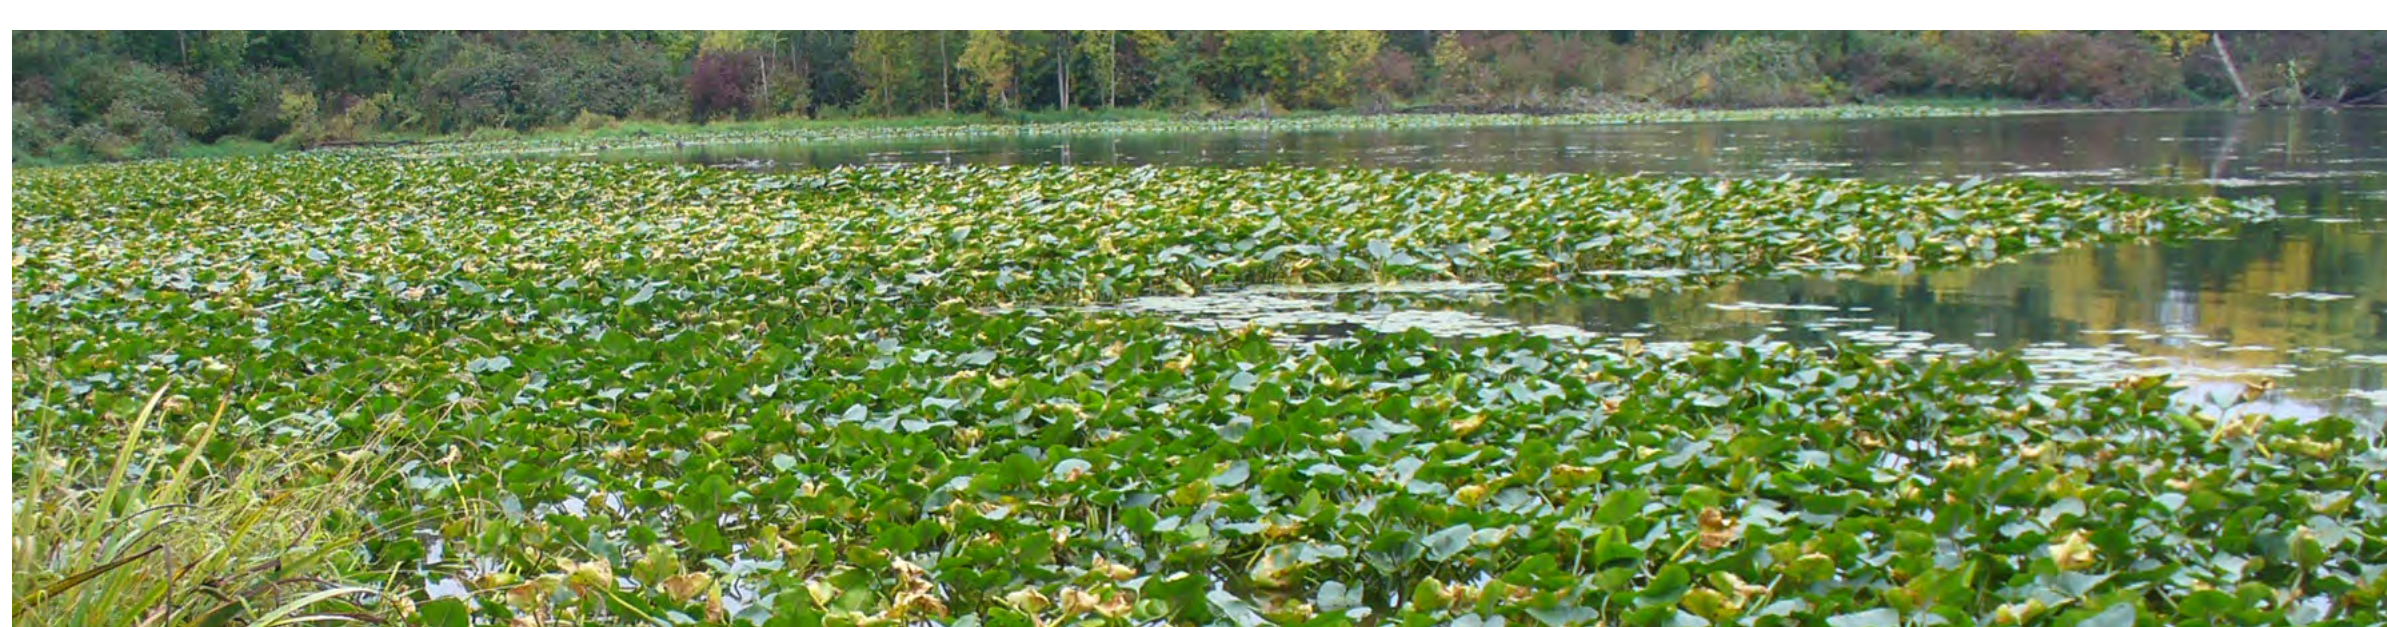

Reduce Flooding

Improving Spawning Habitat

Channel Restoration

Studies are underway to investigate and assess the feasibility of fish habitat restoration actions along Lower Laughing Jacobs Creek. Evaluations will be made and recommendations given for a possible re-routing option for the creek.

## Key Features

- **PRIMARY EMPHASIS ON KOKANEE SALMON (A LANDLOCKED FORM OF SOCKEYE SALMON)**
- **SECONDARY EMPHASIS ON JUVENILE CHINOOK SALMON**
- **THREE POSSIBLE ALIGNMENTS UNDER CONSIDERATION**
- **POTENTIAL RESTORATION ACTIONS EVALUATED BASED ON EFFECTIVENESS OF IMPROVING SPAWNING AND REARING HABITAT**

## Partners

- **WASHINGTON STATE PARKS**
- **TROUT UNLIMITED**
- **LAKE SAMMAMISH KOKANEE WORKGROUP**
- **CITY OF ISSAQUAH**
- **SNOQUALMIE TRIBE**
- **KING COUNTY**
